2021-2023: IT School GoIT
  Fullstack developer
2017-2022: Dnipro State Technical University
  Bachelors degree in Aviation systems and automatics

About Me

With 1 year of commercial experience, I specialize in HTML, CSS, JavaScript, React, React Native, NodeJS, MongoDB, SQL, WebFlow, and WordPress. Proficient in the end-to-end website/app development process, from client requirements to functional prototypes. Skilled in team management and proficient in image, video, and 3D editing using tools like Photoshop, DaVinci Resolve, Blender, Unreal Engine 5 etc.

Recently project experience

Urbex Metro Game

[HTML, CSS, JS, React Native]
Mobile game where the player is asked to choose different story options, collect items and make decisions that determine the plot and ending of the game. My biggest indie game commercial project.

Tort Albania Website

[React, Tailwind, MUI, Framer, Redux, CMS, GMaps, Telegram Bot API...]
Developed a full-scale homemade food delivery service from inception, including a custom CMS, Telegram bot for order management, integrated map service, cart functionality, last order tracking, promotion showcasing, SEO optimization, and various additional features. Recently launched, the service has already generated 2K euros in profit for the client. Has mobile and tablet versions.

B&S Trust 369 Albania Real Estate

[WebFlow, JS, Python, CMS]
Developed a website with a CMS and database tailored for a real estate agency in Albania. Implemented a dynamic property catalogue synced with a Telegram channel for seamless updates. Additionally, client inquiries are routed directly to the administrator via Telegram and WhatsApp. Has adaptive versions. Under construction.

IT Work experience

2022-2024: Web Developer

- Freelance work involved creating applications and websites for various clients. Addressed IT challenges such as database migration from WooCommerce to JSON, automation of processes using Python scripts, and rewriting Telegram bots from Python to Node.js.

2023-2024: 3D Artist

- Freelance work focused on 3D development for environments and architecture. Currently leading a small team to develop a personal PC game on Unreal Engine as a hobby.

2016-2021: Photographer, Videographer

- Specialized in event filming, professional photoshoots, and company presentations.
